In re the application of

Karl EXEL et al

Group Art Unit: 3744

Serial No: 10/045,011

Examiner:

Filed : January 15, 2002

For : MIRROR FOR LASER APPLICATIONS AND
METHOD FOR MANUFACTURE OF SAID MIRROR

INFORMATION DISCLOSURE STATEMENT

Commissioner of Patents and Trademarks
Washington, DC 20231

Sir:

The undersigned is hereby providing the references listed in the enclosed detailed Form 1449.

The following is a translation of the Abstract of the enclosed German patent:

"A cooled mirror, especially used for laser applications, is actuated upon by a cooling liquid, which flows through a plurality of parallel channels and acts upon the lower side of the reflector surface at a plurality of individual points. The speed of the cooling liquid is increased at the time of actuation to such an extent that it hits the back side of the reflector surface as a liquid jet. This surface is comparably thin and flexible and is supported by means of a plurality of supporting elements distant from each other supported by a rigid base body in such a manner that a thermally generated deformation of the reflector surface is substantially decreased or prevented."

Respectfully submitted,

by 
Mitchell B. Wasson, Reg. 27008
